

CommSite
integrated communications

Innovative solutions for your communications needs

www.commsite.net.au • 1300 266 674 • sales@commsite.net.au

WHO WE ARE

We are a innovative and dynamic organisation, adapting quickly to changes in technology and customer requirements. Our diversity of capability is unmatched in the industry.

CommSite Integrated Communications is 100% Australian owned and operated, servicing the radio and electronic communications requirements for clients across a large range of commercial and government sectors. Our focus is to ensure that our customers have the most efficient, reliable and cost effective communication systems available and provide them with the most diverse range of capability.

Since our beginnings in Gippsland, CommSite has expanded rapidly to keep pace with the ever-increasing demand for quality, professional communications services. We have grown to become the leading and best equipped communications provider in Victoria with the largest choice of services delivered to our customers.

We believe in giving customers the benefit of our experience, our diligence and the best of our combined capabilities to bring them the communications support solutions they need with a view to long term commitment of services.

You may need more than an off-the-shelf solution. You may need something that integrates with your existing infrastructure and updates it with the latest technologies. CommSite crosses technology borders, producing reliable, cost effective and integrated solutions.

We will:

- work closely with you to understand your current and future business needs
- deliver solutions that integrate with existing equipment to minimise disruption and maximise your ROI
- undertake continuous product research to ensure we stay at the forefront of communications technology developments
- take pride in our safe work practices and the provision of professional, superior communication services
- focus to continually improve our service and ensure customer satisfaction

The CommSite commitment: We are focused on excellence, honesty and integrity in all we do.

Quality • Innovation • Experience • Reliability • Solutions • Integrity

WHAT WE OFFER

CommSite can provide solutions for all your communications needs.

We have relationships with all the leading vendors and manufacturers, providing detailed engineering data, design information and product support.

We offer:

- radio and telecommunications engineering
- turnkey project management and implementation
- greenfield site construction including civil works
- site surveys and audits
- installation and integration with existing infrastructure
- system support and ongoing maintenance programs
- Perimeter security, access control system installation and maintenance, video management software, cameras
- Optic fibre projects including Pit & Pipe civil works
- VESDA - Very early warning smoke detection solutions,

supply, installations and maintenance

- Radio communications licencing and co-ordination
- much more.

We are justifiably proud of our track record for the delivery of high quality project outcomes. We have long-term contracts with satisfied customers all over Australia, underpinning our long term future.

At CommSite we have gathered together a highly experienced team of trade-qualified radio/electronics technicians, technical officers and engineers who are cross-trained in rigging, construction and project management services. You will find the same professionalism in our office staff, who have been chosen for their skillbase and commitment to the continued growth and success of CommSite.

MEET THE TEAM

CommSite brings together the expertise of multiple trade qualified individuals into a strong team environment, where they are encouraged to share their experience and add new skills. Our team includes industry related skill sets and backgrounds which enhance our diversity and in-house cross training capabilities. We invest in youth, being one of the only radio communications organisations actively training trade apprentices.

Some examples of these skill are:

- Radio Communications Technicians/Technical Officers/Engineers
- Communications Specialists
- Qualified and Experienced Project Managers
- Security System Technicians
- Telco Riggers, Scaffolders, Twin Rope Specialists
- Industrial Electronics Technicians
- Mobile Telecommunications Engineers
- Electricians
- Defence Communication System Technicians
- Optic Fibre Technicians
- Satellite Earth Station Technicians
- Phone System Technicians
- Vehicle Installation Technicians
- Broadcast Technicians
- Apprentice Communications and Electronics Technicians

Drop by our website www.commsite.net.au and check out some more of our team stories. We're proud of our people, we believe they are the best in their fields of expertise.

BUILDING YOUR BUSINESS

We take the same level of pride in our construction, whether your build is from the ground up, or a module for an existing system. Brownfield, greenfield, offshore, onshore, at heights and underground – we are experienced in all project challenges.

When your business relies on its communications, you need a highly-qualified team with in-field technical knowledge. You can rely on us, offering decades of experience in a range of services for your communications site build along with an extensive project track record and a wealth of industry know-how. Turnkey build projects from CommSite can include the following:

- End-to-end project management
- Planning, surveys, council permits
- Design, procurement
- Tower construction, installation and fit-out
- Hut/enclosure supply and installation
- Antennas and coaxial feeder supply and installation
- Utilities connection or solar supply and installation
- Underground telecommunications connections - fibre optics
- Testing, commissioning and documentation
- Ongoing preventative maintenance programs

Discuss your project build needs today with one of our technical team on 1300 266 674. We will help your business get connected and stay connected.

PROJECTS COME IN ALL SIZES

One of the most challenging of our recent projects has been the Analogue to Digital migration of a major Water Utility site which included utilisation of a full suite of DMR Digital technology capabilities.

The project included features such as radio location services above and below ground in a tunnel system, SCADA alarm messaging with text to speech, on-going signal heat mapping, over-the-air programming, centralised operators console, man down and lone worker functions - the end result for the customer was a huge improvement in work efficiency and employee safety.

A selection of other recent projects and contracted support services

- Large water utility – Multi-site trunked radio integrated system to provide remote worker communications and safety solutions, vehicle fleet rollout, construction and fitout of 50 metre lattice tower
- Power generation – A digital solution with proposed vehicle telematics and GPS tracking, vehicle fleet rollout
- Oil & gas – Full support for two large-scale operators including integrated communications systems such as PAGA, radio, microwave, satellite phones/data, pipeline telemetry, both onshore and offshore
- Oil & Gas – Replacement of ageing satellite link equipment onshore to offshore, to full redundant I.P. data system.
- Mobile Telecommunications – Multiple multi-year maintenance and support contracts, Victoria/Tasmania diagnostic and fault rectification works
- Health Care – CCTV, access control and alarm panel support for two 100 plus bed aged care facilities
- Education – University campus site communications support
- Forestry – Vehicle fleet communications and heavy machinery telematics
- Mining – Partnered in a unique system using enclosed RFID antennas for mining vehicles to track movement and load data while in transit
- Transport company – Repeater site installation and upgrade of radio hardware
- Monopole and Tower construction – We have installed more than 100 in an ongoing contract for greenfield site builds as they rollout the wireless network across Victoria
- Leg-strengthening works to a 60 metre LeBlanc Lattice tower
- Water utility – 35 metre concrete monopole greenfield construction to extend network coverage for microwave and SCADA systems
- Industrial Paper Mill – Communications equipment installation and ongoing maintenance contract
- Installation and commissioning of licenced private LTE based stations for multi-point delivery of high-speed data services
- Shire Council – Scoping, design and implementation of CBD safety wireless CCTV System, including ongoing upgrades and support
- Shire Council – Having solutions for remote worker safety, with satellite products & services
- Communications site surveys for pipeline projects to upgrade to new digital radio system
- Large-scale CCTV deployment for security on pipeline valve site enclosures with fibre optic backbone
- Multiple Commercial customers - manage ACMA re-licencing and migration of radio fleets to cater for band plan changes
- Optic fibre installation, termination and acceptance testing

YOU CAN COUNT ON US

Our innovative systems solutions come with the reassuring backup of our exceptional customer service, gained from decades working in communications across all industry sectors.

Maintaining communications infrastructure can be a challenge when your sites are remote from your primary business locations. CommSite Integrated Communications offers a dedicated team of specialists to provide you with a 24/7 solution. We run a large fully equipped fleet of 4WD service vehicles, stocked with all your maintenance spares and consumables.

CommSite personnel have extensive experience in supporting time-critical operations in industries such as power generation, oil and gas and other utilities. We provide full maintenance for site-based radio, telecommunications and mobile fleet communications.

We conduct audits for existing sites, presented in a detailed report on the operational condition, quality and asset details of all on-site equipment. We can then recommend a preventative maintenance regime.

CommSite offers all the services required to ensure your communications investment is properly maintained and operating at its optimum level.

We also provide facilities maintenance including:

- safety climb re-certifications
- feeder and connector checks
- antenna system inspection and reporting
- security, fence and lock maintenance
- weed and pest control
- general landscaping
- minor building repairs

- generator maintenance
- air conditioning
- electrical works and repairs

You can be assured that we are strongly committed to Occupational Health and Safety and have a continuous process of monitoring and evaluating standards on-site, and maintaining staff skills levels. This is managed by a specialised SHEQ Manager and field representatives.

Our personnel maintain qualifications in:

- Safe Working at Heights (Height Awareness) & Vertical Rescue from Heights
- Open Elevated Work Platform Operators
- Heavy Combination Truck Licenses
- Dogging, Rigging & Scaffolding Licenses
- Level Two First Aid
- Registered Electrical Contractors
- Open Licensed Cablers
- Helisea/Bosiet Training (Oil Industry)
- Basic Fire Fighting
- All mobile carrier site inductions
- Construction Card Induction
- Maritime Security Identification Card
- Certificate IV in Occupational Health and Safety
- Private Security Registration

We have Certificate IV in Occupational Health and Safety qualified management and staff who actively monitor our site works and report on performance. All personnel maintain the necessary safety training and inductions required for their daily tasks.

COMMUNICATIONS THAT REACH PEOPLE

“CommSite gives us peace of mind – they have the experience in supporting businesses who rely on high-availability, critical communications systems.”

- one of our satisfied customers

“This industry has a continuous learning curve. We keep ahead by always looking at new technologies. I love the challenges - and that you get to make a real contribution.”

- one of our senior technicians

“Commsite has given myself and multiple other apprentices the opportunity to begin a career in a constantly advancing field, with a terrific team of industry professionals. The team at Commsite always has time to share their own knowledge, expertise and skills with the new generation of technicians to further their skills and knowledge, the company’s growth and the progression of the communications industry.”
